About me

Hi, I'm a software developer currently focused on web and mobile app development.

I'm passionate about the world of technology, and my goal is to grow professionally by continuously acquiring new tools and skills in the field.

I'm also a Systems Engineering student at the Universidad Abierta Interamericana (UAI).

Skills

Clean code writing, Teamwork, Problem-solving, Curious, Versatile, Good written and verbal communication, Self-management of staff and the team.

- JavaScript - 4 years
- TypeScript - 4 years
- React Js - 4 years
- Node Js - 4 years
- React Native - 2 years
- Tailwind Css - 2 years
- PostgreSQL - 3 years
- MongoDB - 3 years

Experience

Software Developer — Full-time

- I am part of the TN mobile app development team, focusing exclusively on the frontend with React Native.
- Development and maintenance of key features for iOS and Android devices.
- State management using Redux Toolkit to ensure scalable and predictable handling.
- Implementation of authentication and real-time services through Firebase.
- Unit testing with Jest and React Native Testing Library, promoting a TDD approach.
- Active collaboration in code reviews, continuous improvement, and adoption of best mobile development practices.
- Consumption of APIs using Axios, ensuring seamless communication with the backend.
- Working under the agile Scrum methodology, participating in daily stand-ups, planning, and retrospectives.

Period: Jan. 2025 - Currently

Company: ArteAr - Team of TN (Todo Noticias)

Rosario, Santa Fe - Argentina

Software Developer — Full-time

- Collaborated on various projects, including: Administrative applications, ERP systems, E-commerce platforms, and eLearning systems.
- Actively participated in all development stages under the agile Scrum methodology, ensuring continuous and organized delivery.
- Developed dynamic and responsive user interfaces using React as the main frontend technology.
- Implemented backend solutions with Node and Express, managing databases such as MongoDB and PostgreSQL.
- Efficiently managed application state using Redux.
- Ensured code quality by implementing unit tests with tools like Jest, Vitest, and Supertest.
- Handled HTTP requests using tools like Axios and SWR, adapting to the specific needs of each project.

Period: Mar. 2023 - Dec. 2024 · 1 year 10 months

Company: Radium Rocket

Rosario, Santa Fe - Argentina

Software Developer — Part-time

- Developed a comprehensive ERP system to optimize employee, client, and project management.
- Collaborated in the discovery phase, translating client requirements into clear and functional technical specifications.
- Implemented dynamic and responsive user interfaces using React and Redux for efficient state management.
- Developed APIs with Node and Express, ensuring seamless communication between client and server.
- Managed MongoDB for data storage, applying validations with Joi to ensure data integrity.
- Implemented unit tests using Jest and Supertest, significantly reducing production errors.
- Actively participated in agile Scrum meetings, facilitating iterative deliveries aligned with client objectives.
